PROJECTS

- **PS-4 Interactive app for Eco-Friendly lifestyle**
  2024
  The IPS-4 Interactive App for Eco-Friendly Lifestyle is designed to promote sustainable living by providing users with personalized tips and resources to reduce their environmental impact. The app features an intuitive interface, offering insights on energy conservation, waste reduction, and eco-conscious product choices. Users can track their progress, set green goals, and receive rewards for meeting sustainability targets. The app also includes social sharing features to encourage community engagement in eco-friendly practices. It aims to foster environmentally responsible habits and promote a greener future.
  Role:Team Member

- **SMS Classifier - Data Science-2024**
   Developed a Python text classification model using TF-IDF to differentiate between spam and non-spam SMS messages, achieving high accuracy. Utilized Multinomial Naive Bayes classifier and achieved effective results.
  Role:Team Member
